

Key Information Document

European Call Option on BAYER N AG (Long)

This is an illustrative Key Information Document (KID), that explains only the general functionality of the product representing an example trade. Your actual transaction may differ regarding costs, performance scenarios and payouts depending on the actual value and investment amount. If you want to receive a KID specific to your transaction, you may request it from your Bank J. Safra Sarasin (Gibraltar) Ltd, London Branch representative.

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name	91 days European Call Option on BAYER N AG (Long) (the product)
Product Manufacturer	Bank J. Safra Sarasin (Gibraltar) Ltd, London Branch, www.jsafrasarasins.com.gi/internet/gi-ldn , for more information call +44 (0)20 3964 9000

Details about the extent of our regulation by the Financial Conduct Authority and Prudential Regulation Authority are available from us on request.
Date of production of the KID	April 29, 2019 17:31 CET

Please note: You are about to purchase a product that is not simple and may be difficult to understand.

I. What is this product?

Type: The product is an "over-the-counter" (OTC) European Call Option on BAYER N AG (Long) derivatives contract.

Objectives: The product is a complex financial instrument linked to one underlying (BAYER N AG - ISIN: DE000BAY0017 / RIC: BAYGn.DE, hereafter referred to as the "underlying").

By entering into this product, you may benefit from any increase in the underlying price above the strike (see table below). It gives you the right (the **option**) to exercise on a given date (the **expiration date**) in the future (the **option style** – here European) and purchase shares of the underlying security at a pre-determined price (the **strike**). For the above mentioned right, you pay a premium (the **option premium**) to the seller of the option contract (Bank J. Safra Sarasin (Gibraltar) Ltd, London Branch).

On the **expiration date**:

- If the final underlying price is **at or above** the strike, you may exercise the option and you will purchase shares of the underlying security at the strike. You will thus be buying shares at a price which would be lower than the final underlying price. Your unrealized profit would equate to the notional multiplied by the percentage difference between the final underlying price and the strike. Fractional shares will be cash settled.
- If the final underlying price is **below** the strike, the option will expire worthless and you will suffer a total loss of your investment (option premium).

The product does not pay any interest or other periodic amount during its lifetime.

Product data:

Option type	Call option (long)	Option style	European style option
Settlement type	Physical	Total premium	4.25 % of the notional
Notional amount	EUR 1,000,000.00	Strike	100.00 % of the market level at time of trade
Spot rate	EUR 59.54	Final underlying price	Closing level of the underlying on the expiration date
Trade date	April 29, 2019	Expiration date	July 29, 2019

Underlying data:

Underlying	BAYER N AG (ISIN: DE000BAY0017 / RIC: BAYGn.DE)	Underlying type	Equity/Ordinary
-------------------	--	------------------------	-----------------

Intended retail investor: This product is intended for retail investors with sufficient knowledge and/or experience in these types of products, an ability to bear significant investment loss and an investment horizon below one year.

Term: The expiration date of the product is July 29, 2019. The term of the product is 91 days. If an extraordinary event occurs the Product Manufacturer is entitled to terminate the Product with immediate effect. You bear the risk that the Product is terminated at an unfavourable time, and you may be unable to reinvest on equally favourable terms. The performance scenarios and cost tables below refer to the recommended holding period of 91 days. As the figures are not annualized, they cannot be compared to figures from products with a recommended holding period greater than 1 year or a different recommended holding period.

II. What are the risks and what could I get in return?

Summary Risk Indicator

Lower Risk < 1 2 3 4 5 6 **7** > Higher Risk

The risk indicator assumes you keep the product until the end of the recommended holding period (July 29, 2019). You may not be able to end your product early. You may have to pay significant extra costs to end your product early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact the capacity of the product manufacturer to pay you. This product does not include any protection from future market performance so you could incur significant losses. If we are not able to pay you what is owed, you could incur significant losses.

Performance Scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns.

Nominal amount EUR 10,000.00

Scenarios		91 days (Recommended holding period)
Stress scenario	What you might get back or pay after costs	EUR -425.00
	Percentage return	-4.25 %
Unfavourable scenario	What you might get back or pay after costs	EUR -425.00
	Percentage return	-4.25 %
Moderate scenario	What you might get back or pay after costs	EUR -425.00
	Percentage return	-4.25 %
Favourable scenario	What you might get back or pay after costs	EUR 1,054.19
	Percentage return	10.54 %

This table shows the money you could get back or pay over the next 91 days, under different scenarios, assuming a nominal value of EUR 10,000.00. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be easily ended. This means it is difficult to estimate how much you would get if you end before the end of the recommended holding period. You will either be unable to end early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

III. What happens if Bank J. Safra Sarasin (Gibraltar) Ltd, London Branch is unable to pay out?

Eligible investors are covered by the Gibraltar Investor Compensation Scheme (the "GICS") and the UK's Financial Services Compensation Scheme (the "FSCS"). This means that if the Bank is unable to meet its financial obligations, eligible investors could claim up to 90% of the Bank's total liability to an eligible investor in respect of eligible investments subject to a maximum payment to any one individual of EUR 20,000 from the GICS the remainder up to GBP 50,000 from the FSCS. Investors should note that the schemes cover the Bank's obligations to the Client, rather than losses an investor may make due to market price falls.

IV. What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the performance of the product. The total costs take into account one-off and ongoing costs. The amounts shown here are the cumulative costs of the product itself, for the recommended holding period. They include potential early exit penalties. The figures assume a nominal value of EUR 10,000.00. The figures are estimates and may change in the future.

Cost over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Nominal amount EUR 10,000.00

Scenarios	If you end at the recommended holding period
Total costs	EUR 50.00
Impact on return (RIY)	0.48 %

Composition of costs

The table below shows:

- the impact of the different types of costs on the performance of the product at the end of the recommended holding period.
- the meaning of the different cost categories.

**This table shows the impact on return**

One-off costs	Entry costs	0.48 %	The impact of the costs you pay when entering your investment. The impact of the costs already included in the price. This is the most you will pay and you could pay less. This includes the cost of distribution of your product.
	Exit costs	n.a.	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	n.a.	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	n.a.	The impact of the costs we take for managing your investments and the costs presented in Section II.

V. How long should I hold it and can I take my money out early?**Recommended holding period: 91 days**

Recommended holding period: until the expiration date. This product is designed to be held to the agreed final settlement date in order to match your investment requirement. Non-transferable over-the-Counter (OTC) products are intended to be entered into for their full term and cannot be easily closed due to the lack of an organised secondary market. In the OTC derivatives market, the product manufacturer acts as a sole market-maker by providing indicative valuation prices, if any, at which you may be able to execute a closing transaction of the product. The cost of an early full or partial closing transaction is linked to different market parameters and could cause a substantial loss or profit to you. Normally the final settlement amount is not subject to any penalty charges.

VI. How can I complain?

If a Client has a complaint arising from their relationship with the Bank and the products or services the Bank has provided to the Client, the Client should contact the Bank at 47 Berkeley Square, London, W1J 5AU, UNITED KINGDOM. Tel:+44 (0)20 3964 9000

VII. Other relevant information

The information contained in this document does not constitute financial, legal or tax advice and/or any recommendation, nor an offer or a solicitation to acquire or sell any investment security, nor to engage in a transaction, nor to conclude any type of business. This information is not intended to be a substitute for obtaining the necessary individual advice and information on risks from a professional advisor. This Key Information Document does not contain all information relating to this product. The relevant trade confirmation and the derivative agreement will constitute the contractual basis between you and the product manufacturer.
